Supported Operating Systems

Linux 2.4.x, Linux 2.6.x

New Features

Added driver background polling feature to eliminate the waiting time when an NPort is not present in Slackware 14.0.

Enhancements

- When using a domain name as the mapping address for NPort, it will be translated every time when Real TTY is opening the port.
- Compiling errors when using secured Real COM mode.

Bugs Fixed

- A call trace may happen with the error message “not syncing: Fatal exception” in kernel 2.6 for specific platforms.
- Compiling error if the kernel version contains the stream “2.4.”
- Real TTY driver installation and uninstallation fails due to insufficient permissions for the /tmp folder.

Changes

- Log file increasing without limit causes a file system crash.
- No longer supports 3.x and above.
